CONTENTS

Special Issue: Horizons in Hydrogen Bond Research. Proceedings of the IXth Workshop, Zeist, The Netherlands, 10–15 September 1989

Preface ix

The directional character of the hydrogen bond in gas-phase dimers
D.J. Millen (London, Gt. Britain) 1

Studies of intermolecular interactions by matrix isolation vibrational spectroscopy: self-association of ammonia
A.J. Barnes (Salford, Gt. Britain) 19

The electron density distribution in the hydrogen bond. A quantum chemical and crystallographic study
D. Feil (Enschede, The Netherlands) 33

Molecular dynamics simulations and quantum mechanical studies of the hydrogen bond in water cluster systems
P.L.M. Plummer (Columbia, MO, U.S.A.) 47

Hydrophilicity of proteins and DNA
M.D. Walkinshaw and P. Floersheim (Basel, Switzerland) 63

Modelling OH···O hydrogen bonds in carbohydrates
G.A. Jeffrey (Pittsburgh, PA, U.S.A.) 75

Computational studies of water clusters: temperature, pressure, and saturation effects on cluster fractions within the RRHO MCY-B/EPEN steam
Z. Slanina (Prague, Czechoslovakia) 81

Ensembles of hydrogen bonds in liquids, ice nuclei and in computer modeling
Yu. Ya. Efimov (Novosibirsk, U.S.S.R.) 93

Rotational isomerism, molecular motion and hydrogen bonding as studied by supersonic jet spectroscopy
M. Ito, S. Yamamoto, T. Aota and T. Ebata (Sendai, Japan) 105

The nature of drastic differences in the recognition of protonated cytidinium and deoxycytidinium cations by their parent nucleosides within dihydrogenphosphate salts in the light of the computer-simulated crystal structure of dCyd hemiphosphate $(dCyd)_2H^+H_2PO_4^-$
M.D. Bratek-Wiewiórowska, M. Popenda, N. Malinowska and M. Wiewiórowski (Poznań, Poland) 123

The role of hydrogen bonding in drug–receptor interactions
D. Hadži, J. Kidrič, J. Koller and J. Mavri (Ljubljana, Yugoslavia) 139

Intermolecular interactions and tautomerism of nucleic acid bases and their analogues
R. Czerminski, K. Szczepaniak, W.B. Person and J.S. Kwiatkowski (Gainesville, FL, U.S.A.) 151

Analysis of isotropic chemical shift data from high-resolution solid-state NMR studies of hydrogen-bonded organic compounds
M.C. Etter, S.M. Reutzel and G.M. Vojta (Minneapolis, MN, U.S.A.) 165

Spectroscopic investigation of ternary solutions: H_2O–CH_3CN–$Cu(ClO_4)_2$
H. Kleeberg (Lahnau, F.R.G.) 187

Thermodynamics of H-bonding in alcohols and water. The mobile order theory as opposed to the classical multicomponent order theories
P. Huyskens, F. Kapuku and C. Colemonts-Vandevyvere (Heverlee, Belgium) 207

Hydrogen-bond networks in supercooled liquid water and amorphous/vitreous ices
J.C. Dore (Canterbury, Gt. Britain) 221

High-pressure and density dependence of H-bond complexes in solutions. A spectroscopic study of intermolecular interactions
W.A.P. Luck, W. Kümmel and T. Mentel (Marburg, F.R.G.) 233
ISIS: a new powerful tool for hydrogen bonding studies
J.L. Finney and J. Tomkinson (Didcot, Gt. Britain) 249
Intramolecular hydrogen bonding in acid malonates. Infrared, NMR and ab initio MO investigations
J. Kidrič, J. Mavri, M. Podobnik and D. Hadži (Ljubljana, Yugoslavia) 265
Far IR spectra of acetic acids in the gas phase. A reinvestigation of the intermonomer vibrations
H.R. Zelsmann, Z. Mielke and Y. Maréchal (Grenoble, France) 273
Stoichiometry of the short-range solvation of diethylamine in proton transfer reactions with 2,4-dinitrophenol and solvation by ethers
M. Abduljaber and R.M. Scott (Ypsilanti, MI, U.S.A.) 285
Steric factors in the short-range solvation of secondary amines
J.A. Tayh and R.M. Scott (Ypsilanti, MI, U.S.A.) 297
Solvation of primary amines: short-range solvation of proton transfer complexes of 2,4-dinitrophenol and *n*-butylamine
S. Guo and R.M. Scott (Ypsilanti, MI, U.S.A.) 307
Hydrogen bond geometry around sugar molecules: comparison of crystal statistics with simulated aqueous solutions
B.P. van Eijck, L.M.J. Kroon-Batenburg and J. Kroon (Utrecht, The Netherlands) 315
Hydrogen-bonding and the sweet taste mechanism
M. Mathlouthi and M.O. Portmann (Reims, France) 327
A computer modelling study of hydrogen bonds in ligand–β-drenoceptor complexes: its implications in the deduction of a receptor map
M.R. Linschoten, G.W.Klein Kranenbarg, S.J. de Kimpe, J. Wilting,L.H.M. Janssen and J.H. van Lenthe (Utrecht, The Netherlands) 339
Polarized FTIR spectra of adamantanol derivatives. Part II. 2-Phenyladamantan-2-ol
J. Baran, M. Wierzejewska Hnat (Wroclaw, Poland), E.T.G. Lutz and J.H. van der Maas (Utrecht, The Netherlands) 355
Polarized IR and Raman study of the $Na_3H(SO_4)_2$ single crystal
V. Videnova-Adrabinska (Wroclaw, Poland) 367
FT-IR spectroscopic study of uracil derivatives and their hydrogen bonded complexes with proton donors. II. Monomer IR adsorptions of thiouracils and 5-halogeno-uracils in argon matrices
M. Graindourze, T. Grootaers, J. Smets, Th. Zeegers-Huyskens and G. Maes (Heverlee, Belgium) 389
Perturbation of liquid-water structure by ionic substances
D.V. Luu, L. Cambon (Montpellier, France) and M. Mathlouthi (Reims, France) 411
